

## ***Creative Social Change: Leadership for a Healthy World***

***Jane McCann***

I'm proud to announce the publication of my chapter on "**Kiwi Ways of Leading: How 30 New Zealand Government Chief Executives Are Encouraging Healthier Cultures,**" which is included in this new book.

The book is rooted in interviews with key thought-leaders in healthy organizational development — Otto Scharmer, Edgar Schein, Peter Senge, Robert Quinn, and Meg Wheatley — and provides key frameworks, tools, and practical questions that can be used for dialogue and action among leaders, policy makers, corporate sustainability officers, and organizational consultants as they consider the interconnections between leadership and sustainability and between the long-term viability of the planet and organizational development.
